## SUMMARY

As a software engineer, I possess a wealth of experience in developing web applications using J2EE technologies, such as Spring, Spring Boot, Spring MVC, and Spring Security. My programming, data structures, algorithms, databases, and networking skills are firmly grounded, and I have been certified in Java, Python, and J2EE. Additionally, I have amassed proficiency in HTML, CSS, Bootstrap, React, and various database management systems. My communication, time management, and problem-solving skills are exemplary.

## EXPERIENCE

### Software Engineer Intern | NewBuffers

May 2022 - September 2022, Remote

- Implemented Back-end features, i.e. User authentication.
- Written valuable code with best practices of Spring boot and Java.
- Used Agile project management tools such as Jira and Slack.
- Implemented test cases for code written in Java and Spring boot.
- Experienced Docker and AWS, and deployed dockerized spring APIs on AWS.
- Also made Front-end with React, using Chakra and Material UI.

## EDUCATION
